Introduction.

Aren't Plugins Brilliant!?

Over recent years, Wordpress has developed from being a simple blogging platform to ... well almost anything you want it to be.

This change has taken place because of plugins.

Those clever little bits of code that add functionality to any simple Wordpress installation.

For example, in the past, having a fully functioning membership site with its own affiliate program & autoresponder would have cost a ton of money to have developed. Just think about it... you can now have something like that set up & ready for content in around 15 minutes or less... and that is just one example.

In this short guide, I will go through some of the FREE plugins that I find essential. Many of these I install on every single Wordpress site I create.

In fact... They should charge for some of these... They are, well, Brilliant!

Free Plugins.

1. Hello Dolly

This is more than just a plugin.... Ahhhh... Almost had you there! Just joking ...This is Wordpress bloatware rubbish and is the first thing I delete when I set up a blog.....now let's get into it...

SEO Plugins

1. WP SEO Plugin by Yoast

This is probably the most complete SEO plugin out there. It allows for a meta snippet preview and does an SEO page analysis for you prior to publishing your post or page, ensuring that you have your keywords mentioned just right. It goes more in depth too. If you are in to SEO you will love it.

2. WP Google Authorship

Also important for SEO but will add your picture next to your posts in the Google search results. Even if you are not #1, it will increase clicks.

→ [Get it here.](#)

Security/Back ups

3. WP Clone

This is a very, very easy way to back up your whole site and even move it to a new domain or server. One click makes a back up URL, then, if you want to import that to a fresh blog, you can do it with one click again. Neat.

→ [Get it here](#)

4. WP Log-in Lockdown

This is a nifty little security plugin that will limit the amount of “tries” that people have to access your blog. It will then lock them out for a period & if they continue, will extend the locked out period. Although it may not thwart an all-out bot attack, it is far better than having no security at all.

Legal Stuff

5. WP Auto Terms of Service

Put your own details into a modified version of these terms of service and privacy pages.

→ [Get it here](#)

6. Secure Contact Form

This makes a nice looking & editable contact form so your e-mail is not out there on the net.

→ [Get it here](#)

Time Saving & Ease of Use

7. WP Duplicate Post

This enables you to instantly clone a page or a post. Very useful if you want to split test variations of squeeze page or sales page. All of the settings, styles etc are cloned into a new draft version of the page or post in just one click.

→ [Get it here](#)

9. TinyMCE Advanced

This expands the functionality of the visual html editor, so you will have loads more styling choices when making a post or a page. It also has the ability to choose how individual links open. So you can, for example, have a link opening in a small pop-up window.

→ [Get it here](#)

10. WP Insert

This is the easiest tool to deploy adverts or banners anywhere on your blog... I mean anywhere. In content above/below content, in the widget area. All done from one dash so its easy to change things when you want to.

→ [Get it here](#)

11. Share This for Wordpress

This adds a funky share button graphic on the side of your site and near the top. There are loads of other things you can configure too. Best looking & easiest share tool I have used.

→ [Get it here](#)

12. Amazon Link Localizer

If you display Amazon products on your blog & want to still get credited for sales from the different Amazons around the world, then this is a must. Pop your Amazon Ids in and it will sort out were the visitor is coming from for you. Easy & effective.

Some Premium Plugins That Are Worth Every Cent.

These are just a few...Only the best of the best for this report. If you want to make money online & you are going to be using Wordpress, then seriously consider these plugins. I have each of them & use them all the time - they work well together... and they really make building a business much easier!

Fastmember

This is probably the easiest to use and most feature rich membership site plugin out there. It transforms your WordPress site into a fully-fledged membership site with all the bells & whistles. Even including an autoresponder and an affiliates program if you want to use them.

→ [Get it Here](#)

Instabuilder 2.0

This is an extremely capable plugin that makes building squeeze pages, landing pages, sales pages an absolute breeze. It has many other neat tricks up its sleeve too. Adding lightbox content pop-ups & cool graphics. It is an awesome tool.

→ [Get it here](#)

EasyAzon

This Amazon plugin allows you to quickly and easily add Amazon affiliate links to your Wordpress posts and pages. You can search from within Wordpress for products to add and insert text affiliate links, image affiliate links or a product info block. Quick and easy to use, this is probably the best plugin on the market for Amazon affiliates.

Conclusion.

I hope that this guide has been helpful for you.

There are thousands upon thousands of plugins out there with more being developed all the time. Choose wisely and you will be able to do pretty much whatever you want online with a simple Wordpress blog.
